TICKETLESS VALET

How it works

Take a look at how we makes the entire process seamless.

1 - CHECK-IN

As soon as your guests arrive, the valet driver issues a digital ticket and sends an SMS to the guest with the access link.

3 - REQUEST

Guests can request their vehicle in person or in advance via their web ticket. The valet staff is immediately notified.

2 - PARKING

For maximum efficiency, parking info including Vehicle Location and Key Slot is recorded in our system.

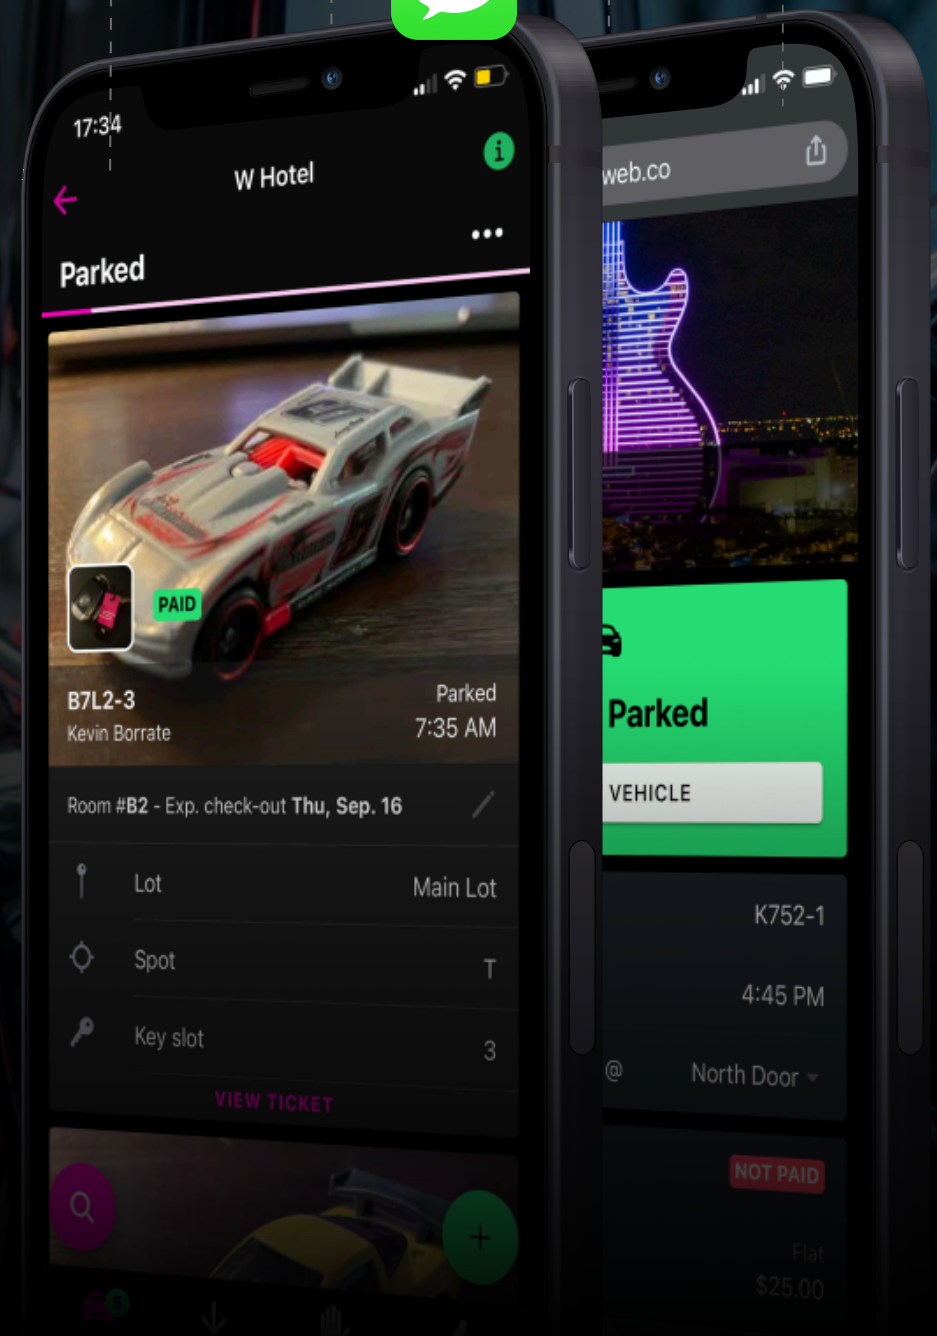

4 - CHECK-OUT

After a guest leaves, all ticket information is securely stored for reporting and business optimization purposes.
